

## CLEANING & CARE INSTRUCTIONS

### **INSTALLERS: DO NOT REMOVE THIS NOTICE**

**WARNING!** DO NOT PLACE ITEMS IN THE CORNER OF THE CABINET AS THIS CAN RESTRICT THE FUNCTION OF THE HINGE AND MAY RESULT IN DAMAGE TO SAME.

*Thank you for purchasing a Sofia Medicine Cabinet; we manufacture our cabinets in the USA using the finest materials. We are confident that your new cabinet will give you many years of trouble free service; please follow these tips on care and cleaning of your new cabinet.*

1. **NEVER** use glass cleaners that contain **AMMONIA** or **VINEGAR**. These are harsh chemicals that can damage the silver backing of your mirror causing it to corrode.
2. To clean the mirrors, we suggest a **mild soap and water solution**, please be sure to dry all surfaces when finished.
3. **DO NOT** handle mirrors if you have chemicals on your hands. Nail polish remover, silicones and any chemical cleaners that are used to clean tiles, should be avoided at all times.
4. It is recommended to spray cleanser first on towel and then wipe down mirror. **Avoid spraying directly on glass.**

**Use your cabinet in good health.**
